JBIS

Journal of the British Interplanetary Society

VOLUME 49 **1996**

INDEX

EDITORS	*THEMES*
E.Belbruno	Practical Robotics for Interstellar Missions (Parts I, II and III)
F.I.Ordway III & F.Winter	Pioneering Rocketry and Spaceflight (Part VI)
L.J.Carter	General Issue
D.G.Fearn	Electric Propulsion (Part II)
R.Hall	Soviet Astronautics
S.Santoli	Exobiology (Part V)
K.Wright	Vision 60 Plus (Part I)
R.Zubrin	Mars Exploration
D.G.Fearn	Affordable Space Missions

AUTHOR INDEX

Anderson J.L.	Leaps of the Imagination: Interstellar Flight and the Horizon Mission Methodology	15
Andrews D.G.	Cost Considerations for Interstellar Missions	123
Barrington Brown A.J., Ward A.K. & Entwistle P.M.	Transputers and Their Use in On-Board Computers	209
Burkhalter B.B.,Sharpe M.R. & Fisher J.E.	Direct Implications of Total Quality Management Trends in the Aerospace Industry	229
Cassenti B.N.,Matloff G.L. & Strobl J.	The Structural Response and Stability of Interstellar Solar Sails	345
Cassenti B.N.	Robotic Interstellar Missions and Advanced Nuclear Propulsion	357
Clark P.S.	The Flight of Cosmos 2290 (1994-053A)	259
Clark P.S.	The History and Projects of The Yuzhnoye Design Bureau	267
Fearn D.G. & Wallace N.C.	A Low Altitude Mapping Mission Using Ion Propulsion for Drag Compensation	173
Fearn D.G.	The Ulysses Mission: The Ion Propulsion Alternative	181
Finn J.E.,Sridhar K.R. & McKay C.P.	Utilisation of Martian Atmosphere Constituents by Temperature-swing Adsorption	423
Fitz-Coy N. & Jang H.W.	A Game Theoretic Approach for Active Vibration Isolation of a Space Platform	203
Fogg M.J.	The Utility of Geothermal Energy on Mars	403
Forward R.L.	Ad Astra!	23
	Radioisotope sails for Deep Space Propulsion and Power	147
Gilbertson R.G. & Busch J.D.	A Survey of Micro-actuator Technologies for Future Spacecraft Missions	129
Gray H.,Smith P. & Fearn D.G.	UK Ion Propulsion System Development	163
Hale A.	Nearby Solar-type Stars as Candidates for Interstellar Robotic Missions	150
Handberg R.	The Art of the Possible: Economic Prospects for Space, Fantasy and Practicality	381
Hansson A.	Towards Living Spacecrafts	387
Hempsell C.M. & Moses R.T.	Microsatellites as an Educational Tool - The BUS-Alpha Experience	469
Horvath J.C.	Spacecraft Autonomy Issues: Present and Future	215
Hunley J.D.	The Legacies of Robert H. Goddard and Hermann J. Oberth	43
Kammash T & Lee M.J.	A Fusion Propulsion System for Near-term Space Exploration	351
Launius R.D.	A Waning of Technocratic Faith: NASA and the Politics of the Space Shuttle Decision	49
Leipold M.,Lingner S.,Borg E. & Bruekner J.	Mercury Imaging from a Sun-synchronous Solar Sail Orbiter	105
Lesh J.R.,Ruggier C.J. & Cesarone R.J.	Space Communications Technology for Interstellar Missions	7
Lowman Jr. P.D.	T Plus Twenty Five Years: A Defense of the Apollo Program	71
Maccone C.	Telecommunications, KLT and Relativity	155
Martin A.R.	The Real Costs of Affordable Access to Space	443
Martin A.R.,Moulford W.E.F.L. & Fearn D.G.	Low-cost Interplanetary Missions using Electric Propulsion	447
Matloff G.L.	Use of Parabolic Solar Concentrators to Improve the Performance of an Interstellar Solar Sail	21
Matloff G.L.	Robosloth: A Slow Interstellar Thin-film Robot	33
Matloff G.L.	The Impact of Nanotechnology upon Interstellar Solar Sailing and SETI	307
Mautner M.N.	Space-based Genetic Cryoconservation of Endangered Species	319
Meiner R.C.	Space, Direction for Unlimited Growth	397
Mileikowsky C.	How and When Could We Be Ready To Send a 1,000 kg Research Probe with a Coasting Speed of 0.3 c to a Star	335
Noble R.J.	Radioisotope Electric Propulsion for Robotic Science Missions to Near-Interstellar Space	322
Noble R.J.	Radioisotope Electric Propulsion for Small Robotic Space Probes	455
Peeters W. & Sciacovelli S.	Communication Related aspects in Multinational Missions: EUROMIR 94	113
Petrakov V.M.	Soviet Rockets for Space Apparatus	277
Pilcher C.B.	Are We Ready?	37
Post J.V.	Hydrogen Ice Spacecraft for Robotic Interstellar Flight	139
Potter S.D. & Matloff G.L.	Light Sail Propulsion using Thin-film Photovoltaic Technology	329
Probert T.,Hood J. & Hearney S.	Mission Planning and Scheduling Concept for the MSTI-3 Satellite	97
Raitt D.,Pseiner K. & Atzei A.	Space 2020: Looking to the Future	391

Routier D.	A Solar-ion Propelled Mission to the Local Interstellar Medium	193
Sanders B.	An Analysis of the Trajectory and Performance of the N-1 Lunar Launch Vehicle	249
Santoli S.	1/f Music vs. ETI's ORACLE Machines - A Mesoscopic Loophole in the Barrier of Meaning	303
Santoli S.	2060 AD and Beyond: Envisageable Space Robotics from Newly-emerged Concepts in Miniaturisation and Information Physics	371
Shmatov M.L.	Ignition of Microexplosion by the Laser Pumped by Another Microexplosion	475
Sieving D.L.	A Centrifugal Habitat for Reduced Gravity Environments	83
Sridhar K.R.	Mars Sample return Mission with ISPP	435
Swanson G.E.	Spaceport Michigan - When Rockets Flew from the Great Lakes State: 1962-1971	59
Tarter D.E.	Alternative Models for Detecting Very Advanced Extra-terrestrial Civilisations	291
Tipler F.J.	The Twin Paradox for Constant Acceleration Spacecraft	227
Tipler F.J.	Travelling to the Other Side of the Universe	313
Vallée J.P.	The Potential of SETI for Major Existential Models	283
Van Cleve J.,Rieke G. & Cruikshank D.	Infrared Inferences of Planetary Systems among the Nearby Stars	3
Zak A.	The Cradle of the Russian Rocket Science	243
Zubrin R.	Detection of Extraterrestrial Civilisations *via* the Spectral Signature of Advanced Interstellar Spacecraft	297
Zubrin R.	The Significance of the Martian Frontier	365
Zubrin R.	Athena: A Possible First Step in a Program of Human Mars Exploration	431

SUBJECT INDEX

Adsorption on Mars 423
Apollo Program 71
Athena Mars mission 431
Badr B, computers 209
Biological computers 387
Book Notices 238
BUS-Alpha microsatellite 469
Centrifuges 83
Communications Systems,EUROMIR 113
Computers, on-board 209
Congress Report 295
Conservation 319
Control Theory 203
Correspondence 80
Cosmos 2290 259
Economics of spaceflight 381,443
Education, satellite project 469
Endangered Species 319
ESA, plans for 2020 AD 391
EUROMIR 94 113
Future of humanity, ESA plans 391
  Growth into space 397
  Martian Frontier 365
Game Theory 203
Geothermal Energy on Mars 403
Goddard, Robert H. 43
Gravity, Artificial 83
Horizon Mission Methodology 15
Hydrogen Ice Structures 139
Infrared Excess, Solar System 3
Interplanetary Missions
  Low cost 447
Interstellar Medium Probe 193
Interstellar Missions
  Communications 7,155
  Cost 123,335
  Destinations 150
  Feasibility 23,37,123,335
  Horizon Missions 15
  Long Range 313
  Propulsion Methods 23,123,147 322,351,357,475
  Biological seeding 387
  Solar Sails 21,33,307,329,345
  Structures 139,345
  Twin Paradox 227
Ion Propulsion
  Missions 173,181,193,447
  Near-Interstellar Use 322,455
  UK Development 163
Keweenaw Point Range 59
KLT Transform 155
Laser Communications 7
Laser ignition for propulsion 475
Launch vehicles, costs 443
Long Duration Missions
  Across Universe 313
  Psychological/cultural aspects 113
Mapping Satellite 173
Mars
  Athena initial mission 431
  Frontier for humanity 365
  Geothermal Energy 403
  Resources from atmosphere 423,435
  Sample return mission 435
Michigan Rocket Range 59
Micro-actuators 129
Microsatellites 469
Miniaturisation 371,387
Mission Planning 97
MSTI-3 97
N-1 Rocket 249
Nuclear Pulse propulsion 475
Oberth, Hermann J. 43
Planetary Exploration 105
  Automation 215
Planetary Systems 3
Radioisotope Sails 147
Reconnaissance Satellite 259
Robotic Spacecraft 215,371
Political Decision Process 49
Propellant production on Mars 435
Rocket Pioneers, Goddard & Oberth 43
SETI,
  Advanced Civilisations 291
  Communication Strategy 303
  Effect on Existential Models 283
  Interstellar Spacecraft 297
  Quantum Communication 291
  World Ships 307
Solar Sails,
  Concentrator Use 21
  Mercury Orbiter 105
  Particle Beam Accelerator 33
  Structural Aspects 345
  World Ships 307
SOHO, computers 209
Soviet Rocketry 249,267,277
Space Shuttle, Decision 49
Stars, Nearby Solar-type 150
Total Quality Management 229
Transputers 209
TsNIIMash 243
Twin Paradox 227
Ulysses Mission
  Ion Propelled Alternative 181
Vibration Isolation 203
Yuzhnoye Design Bureau 267
